MECHANISMS OF CHEMICAL-INDUCED PORPHYRINOPATHIES[a]

Editors and Conference Organizers

ELLEN K. SILBERGELD and BRUCE A. FOWLER

CONTENTS

Preface. *By* ELLEN K. SILBERGELD and BRUCE A. FOWLER ix

Mechanisms of Chemical-Induced Porphyrinopathies: Introductory Comments. *By* ATTALLAH KAPPAS 1

Part I. Regulation of Heme and Porphyrin Metabolism

Zinc Protoporphyrin: Past, Present, and Future. *By* ROBERT F. LABBÉ, REBECCA L. RETTMER, ALKA G. SHAH, and JUDITH R. TURNLUND 7

Genetic Regulation of the Heme Pathway. *By* SHIGERU SASSA, HIROYOSHI FUJITA, and OSAMU SUGITA 15

δ-Aminolevulinic Acid Dehydratase Isozymes and Lead Toxicity. *By* K. H. ASTRIN, D. F. BISHOP, J. G. WETMUR, B. KAUL, B. DAVIDOW, and R. J. DESNICK 23

Part II. Mechanisms of Metal-Induced Porphyrinopathies

Occurrence and Biological Properties of *N*-Methyl Protoporphyrin. *By* FRANCESCO DE MATTEIS, ANTHONY H. GIBBS, and ANN E. HOLLEY 30

Metal-Induced Alterations of δ-Aminolevulinic Acid Dehydratase. *By* ALFRED BERNARD and ROBERT LAUWERYS 41

Effect of Lead on Uroporphyrin and Heme Content in the Bone Marrow of Rats Exposed to Nitrous Oxide. *By* WALTER N. PIPER and W. RUSS CHRISTENSON 48

Metal Alteration of Uroporphyrinogen Decarboxylase and Coproporphyrinogen Oxidase. *By* JAMES S. WOODS and BRUCE A. FOWLER 55

Metal Induction of Heme Oxygenase. *By* F. WILLIAM SUNDERMAN, JR. 65

Metal Inhibition of Ferrochelatase. *By* HARRY A. DAILEY 81

Control of Heme Metabolism by Synthetic Metalloporphyrins. *By* GEORGE S. DRUMMOND 87

[a]This volume is the result of a conference entitled Mechanisms of Chemical-Induced Porphyrinopathies, which was held in Rye Brook, New York on October 27–29, 1986 by the New York Academy of Sciences.

Part III. Mechanisms of Halogenated Organic-Induced Porphyrinopathies

Role of Cytochrome P-450 in Porphyria Caused by Halogenated Aromatic Compounds. *By* HERBERT L. BONKOVSKY, PETER R. SINCLAIR, W. JAY BEMENT, RICHARD W. LAMBRECHT, and JACQUELINE F. SINCLAIR 96

Patterns of Porphyrin Accumulation in Response to Xenobiotics: Parallels between Results in Chick Embryo and Rodents. *By* GERALD S. MARKS, JANE POWLES, MARTHA LYON, STUART MCCLUSKEY, ELAINE SUTHERLAND, and DAVID ZELT 113

Effects of Chlorinated Organics on Intermediates in the Heme Pathway and on Uroporphyrinogen Decarboxylase. *By* LAVINIA CANTONI, MILENA RIZZARDINI, ANDREA GRAZIANI, CARMEN CARUGO, and SILVIO GARATTINI 128

Alterations of Uroporphyrinogen Decarboxylase by Chlorinated Organics. *By* G. H. ELDER, A. G. ROBERTS, and A. J. URQUHART 141

Inhibitory Effect of Tetrachloro-*p*-Hydroquinone and Other Metabolites of Hexachlorobenzene on Hepatic Uroporphyrinogen Decarboxylase Activity with Reference to the Role of Glutathione. *By* GÜNTER KOSS, MARGA LOSEKAM, JUTTA SEIDEL, KLAUS STEINBACH, and WOLFGANG KORANSKY . 148

Biochemical Studies on Griseofulvin-Induced Protoporphyria. *By* TOKIO SHIMOYAMA and SHIGEO NONAKA 160

Part IV. Porphyrins as Indicators of Chemical Injury and Exposure

Porphyrins as Indicators of Chemical Injury and Exposure. *By* ELLEN K. SILBERGELD 170

Metal- and Metalloid-Induced Porphyrinurias: Relationships to Cell Injury. *By* BRUCE A. FOWLER, AGNETA OSKARSSON, and JAMES S. WOODS 172

Turkish Epidemic Hexachlorobenzene Porphyria: A 30-Year Study. *By* HENRY PETERS, DEREK CRIPPS, AYHAN GÖCMEN, GEORGE BRYAN, ERDOGAN ERTÜRK, and CARL MORRIS 183

Lead Effects on the Heme Biosynthetic Pathway: Relationship to Toxicity. *By* MICHAEL R. MOORE, ABRAHAM GOLDBERG, and ALBERT A. C. YEUNG-LAIWAH 191

Porphyrinurias and Occupational Disease. *By* MANFRED O. DOSS 204

Porphyrins in Urine as an Indication of Exposure to Chlorinated Hydrocarbons. *By* J. J. T. W. A. STRIK 219

Mechanism of PCB-Induced Porphyria and Yusho Disease. *By* YOSHIHIKO SEKI, SHOSUKE KAWANISHI, and SEIYO SANO 222

Part V. Factors Influencing Alterations in Heme Metabolism and Function

Regulatory Roles of High-Affinity Metal-Binding Proteins in Mediating Lead Effects on δ-Aminolevulinic Acid Dehydratase. *By* PETER L. GOERING and BRUCE A. FOWLER 235

Drug-Induced Modulations of Hepatic Heme Metabolism: Neurological Consequences. *By* MARIA ALMIRA CORREIA, DAVID A. LITMAN, and JENNINE M. LUNETTA 248

Hormonal Regulation of the Heme Pathway. *By* RICHARD A. GALBRAITH 256

Part VI. Porphyrinopathies in Chemical-Induced Disease States Involving Specific Organ Systems

The Dermatologic Manifestations of Human Porphyria. *By* DAVID R. BICKERS . 261

Alterations in Renal Heme Biosynthesis during Metal Nephrotoxicity. *By* AGNETA OSKARSSON and BRUCE A. FOWLER 268

Lead-Induced Abnormalities of Porphyrin Metabolism: The Relationship with Iron Deficiency. *By* SERGIO PIOMELLI, CAROL SEAMAN, and SHIV KAPOOR . 278

Porphyrins and Hepatotoxicity. *By* RENATE D. KIMBROUGH 289

Role of Altered Heme Synthesis in Chemical Injury to the Nervous System. *By* ELLEN K. SILBERGELD 297

Mechanisms of Toxicity of Photoactivated Artificial Porphyrins: Role of Porphyrin–Protein Interactions. *By* ANN SMITH 309

Principles for Application of Porphyrin Markers in Epidemiological Studies. *By* PHILIP J. LANDRIGAN 323

Comments on Porphyrin. *By* NORTON NELSON 327

Poster Papers

Hematoporphyrin Derivative Uptake and Tumor Cell Density. *By* GRETA M. GARBO, RICK W. KECK, STEVEN H. SELMAN, and MARTHA KREIMER-BIRNBAUM 328

Mechanism of Urinary Excretion of δ-Aminolevulinic Acid after Intratracheal Instillation of Gallium Arsenide. *By* PETER L. GOERING and BRUCE A. FOWLER 330

Studies on the Role of the *Ah* Receptor in Hexachlorobenzene-Induced Porphyria. *By* MARK E. HAHN, THOMAS A. GASIEWICZ, PATRICIA LINKO, and JOYCE A. GOLDSTEIN 333

Porphyria Cutanea Tarda: Manifestation and Therapy. *By* VÁCLAV KORDAČ, PAVEL MARTÁSEK, VLASTIMIL ZOUBEK, and MILAN KALÁB 335

Comparison of Uroporphyrinogen Decarboxylase Activities and Uroporphyrin Accumulation in Mice, Japanese Quail, and Cultured Chick Embryo Hepatocytes Treated with Polyhalogenated Aromatic Compounds. *By* R. LAMBRECHT, P. SINCLAIR, W. J. BEMENT, J. SINCLAIR, and H. CARPENTER 337

Mathematical Models for Effects of Xenobiotics on Heme Biosynthesis: Application to Lead. *By* ALLAN H. MARCUS 339

Induction of Acute Attack in Acute Hepatic Porphyrias: Experiences with Diagnosis and Therapy over Thirty Years. *By* PAVEL MARTÁSEK, VÁCLAV KORDAČ, MICHAELA KOZÁKOVÁ, MILAN JIRSA, PETR KOTAL, and JIŘÍ HORÁK 342

Overcoming the Limitations of Hematofluorometry for Assaying Zinc Protoporphyrin. *By* REBECCA L. RETTMER, ELAINE W. GUNTER, and ROBERT F. LABBÉ 345

Evidence for 3,4,3′,4′-Tetrachlorobiphenyl-Mediated Oxidation of Uroporphyrinogen by Chick Embryo Liver Supernatants. *By* PETER R. SINCLAIR and RICHARD W. LAMBRECHT 347

An Association between Zinc Protoporphyrin Elevation and Recovery from Acute Hematopoietic Damage. *By* THOMAS L. WALDEN, JR., HUDA M. AL-ANSARI, and WALTER R. FARKAS 349
